Letters of
Recommendation

DAKIN CAPITAL LLC

February 16, 2022

To Whom it may concern,

After researching many possible solutions and technologies, I decided on Air Disinfection Biosecurity Technology, based on the company's experience and international presence. Their willingness to demonstrate the efficacy of the equipment on-site at my office building was what finally sold me. The company assured us that the technology would achieve a 50% or greater microbial reduction in 30 days. When the independent lab results showed we achieved a 93.1% reduction in 30 days, I knew I'd made the right choice.

My belief in the merits of the ADB equipment has been validated by third-party lab testing of air and surface samples collected several times since the equipment was installed. This testing shows hard data that the equipment has achieved and maintains a 90+% reduction in all pathogens in my office.

We all feel more secure coming to work knowing that we have continuous protection in our space. Covid has had a minimal impact on our business, and I attribute that to having continuous protection throughout the entire location. The technology has completely exceeded our expectations, and we highly recommend ADB equipment."—Karl Dakin

MICK MULLENS IRISH BAR & CITIZENS RUGBY OFFICES

February 17, 2022

Everyone:

Mick Mullens Irish Bar endorses the use of the Air Disinfection Biosecurity (ADB) Technology.

On March 26th, 2020 our Bar was selected by the readers of Westword as The Best New Bar. Just days later, we were shut down by the Colorado Department of Health in response to COVID. Our future was uncertain. We believed air disinfection was the way to go, but sorting through all the different technologies was overwhelming. We ultimately selected ADB because of its solid science and the professionalism of the sales and installation crew.

Once the ADB equipment was installed, we were thrilled to be able to attain a 5 Star Certification as a Recovery Program Partner of the City of Englewood, Arapahoe County, and the State of Colorado. We were able to re-open earlier than other non-essential businesses, which we attribute to ADB creating a safe indoor environment that ultimately saved our business.

Since installation on December 12, 2020, periodic testing shows that we have the cleanest air of any bar in Denver, Colorado, insuring the confidence of our staff and our customers.

A handwritten signature in black ink, appearing to read 'Michael Fealey', is written over a horizontal line.
